

illume Manhole

Brighten your home and lighten your roof space

Installing an illume Manhole is an innovative new way to light up those dark areas of your home such as hallways and laundries (where manholes are typically positioned). Combining the revolutionary illume Skylight Alternative with the traditional Kimberley Manhole system has created a clever and practical solution to a once wasted area of ceiling space.

Meanwhile, the dual purpose design delivers the added benefit of safely brightening your roof cavity when the illume Manhole is opened for access.

- ✓ Works without batteries
- ✓ No mains power required
