

Kimberley Solar Roof Ventilators are designed to balance the temperature in the home by assisting interior vents to filter out humidity and heat.

Wind driven turbine roof ventilators can be very inefficient and noisy. Solar ventilators work silently whenever the sun is shining to purge the warm air from your roof cavity.

**UP TO
15X
MORE EFFICIENT
THAN A
WHIRLYBIRD**

AIR EXCHANGE

31m³/min (cubic metres per minute)
1868 m³/h (cubic metres per hour)

THERMOSTAT OPERATION

Cut-in @ 28+3°C
Cut-out @ 20+5°C

FAN BLADE

Patented non-corrosive turbine

MOTOR

12W Brushless DC Motor

MODEL: KSV200

Solar Roof Ventilator

THE SOLAR ADVANTAGE

Moisture and humid air gathers in the roof cavity and condense into water droplets when the roof cools. Activities such as showering, cooking and doing the laundry add to this, which can lead to mildew that damage plasterboard, weaken building materials and lead to electrical problems.

The Kimberley Solar Ventilator effortlessly extracts the heat and moisture. Unlike rotary (whirlybird) ventilators which are prone to noise and vibration as the bearings inevitably fail, the brushless motor of the Solar Roof Ventilator reduces the vibration from the roof vent significantly.

The Kimberley Solar Roof Ventilator exchanges more than fifteen times more air, than a whirlybird and provides effective ventilation during hot, sunny, and especially calm, windless days.

ACCESSORIES

Round Vent Duct
400mm x 2.0m

Square Vent Duct
400mm x 2.0m

Eave Vent 150x
75mm

Ember & Pest Shield
<2mm Apertur

AC Power Adaptor

| Roof Size | Ventilators |
|-------------------------------|-------------|
| up to 185m ² | 1 |
| 185 - 290m ² | 2 |
| larger than 290m ² | 2+ |

FEATURES

- Reduces moisture, mould and heat levels
- Fully solar-powered - no operating costs
- Helps prevent damage to electrical systems
- Doesn't rely on wind velocity to operate
- Reduces cooling energy costs
- Auto-adjusts speed to available sunlight
- Rust-resistant galvanised steel chassis
- Tempered glass solar panel component
- Non-corrosive aluminium fan blade
- Brushless DC motor

SPECIFICATIONS

- Dimensions: 605W x 605D x 230H
- Finish: Black
- Under Roof Capacity: 185m² per unit
- Order Code: KSV200
